4. Emissions Categories Explained

Scope 1 – Direct emissions: Emissions generated directly from sources owned or controlled by the company, such as fuel combustion and company-owned or controlled vehicles, where applicable.

Scope 2 – Indirect energy emissions: Emissions associated with the generation of purchased electricity, heating, cooling and other energy consumed by the company.

Scope 3 – Other indirect emissions: Other indirect emissions arising across the company's value chain, which may include purchased goods and services, business travel, employee commuting and waste disposal.

5. Environmental Commitment

Jurichez Ltd is committed to improving its environmental performance and supporting the reduction of greenhouse gas emissions through appropriate business practices. The company aims to:

- Promote responsible energy consumption.
- Encourage efficient use of resources.
- Reduce unnecessary business travel where practical.
- Encourage recycling and responsible waste management.
- Consider environmental impact when selecting suppliers and purchasing goods and services.
- Review environmental performance periodically and identify opportunities for improvement.

6. Declaration and Authorisation

The figures stated in this declaration are presented as Jurichez Ltd's reported greenhouse gas emissions for the periods shown. They should be retained with supporting activity data, calculations and records. Where estimates or exclusions have been used, these should be documented separately.
